Your business is going digital.

It depends on streamlined global access to applications and data, on premises and in the cloud. Your workforce is increasingly mobile and working from remote, conducting business anytime and everywhere. Your legacy network provider is built around a rigid and expensive integration of multiple third party point products, that can’t keep up with a high velocity digital business.

Cato provides a converged SD-WAN and network security as a global cloud service. Aligned with Gartner’s Secure Access Service Edge (SASE) framework, Cato Cloud connects all data centers, branches, mobile users, and cloud resources into an agile and secure global network. Our service empowers you to connect, secure, and run the network yourself, and supports you with expert managed services if you need them. Cato’s cloud-native architecture delivers a future-proof network that evolves at the pace of your business. With Cato, your network, and your business, are ready for whatever comes next.

World-class Investors

Shlomo Kramer
CEO and Co-Founder

One of the founding fathers of the network security industry. He co-founded Check Point Software and Imperva - both multi-billion dollar publicly traded companies. He was inducted into the InfoSec Hall of Fame in April 2013.

Gur Shatz
President, COO & Co-Founder

A leading expert in cloud-scale networking and security infrastructure. He built the Imperva SecureSphere Web and Data security platform and later founded Incapsula, a global anti DDoS cloud service.

Decades of Networking and Security Experience
Cato’s management have been working together for many years in multiple successful enterprises.

RingCentral
“We found that Cato was able to accommodate more than 15 percent packet loss and still maintain a high-level of voice quality, a significant achievement in providing superior customer experience.”

komax
“With Cato, deploying branch SD-WAN became simpler, faster, and with less operational costs than we experienced with a managed service running security processing on SD-WAN appliances.”

AdRoll
“We found that Cato was able to accommodate more than 15 percent packet loss and still maintain a high-level of voice quality, a significant achievement in providing superior customer experience.”

Paysafe:
“Cato’s mobile VPN is my secret BCP [business continuity plan] in my back pocket. If my global network goes down, I can be like Batman and whip this thing out.”

ASM
“It’s rare that you hear from users when things are going well, but, amazingly, during the POC we had users from all over the business thanking us and telling us how much it was improving their daily business productivity.”

Testimonials

40+
Public Case Studies

“Cato Networks’ SASE really is a true cloud solution, not a legacy technology which was ‘rebuilt’ to become cloud-enabled.”

PowerSchool
“Cato is the Apple of SD-WANs.”
Service

Global Private Backbone
60+ Points of Presence (PoPs) in all major business markets.

Enterprise-Grade Network and Security
Available at all PoPs at scale. No need to compromise on network quality or security protection anywhere.

Intelligent Last-Mile Management and Managed Detection and Response
Cato provides the resources and expertise many enterprises struggle with.

World Class Support and Services
24 x 7, global NOC and SOC, with dedicated engineering and support teams.

Cato customers have the opportunity to shape our roadmap and help prioritize future capabilities.

Cato is recognized by Gartner as a Sample Vendor for:

- SASE
- SD-WAN
- FWaaS
- ZTNA
- SDCI
About Cato Networks

Cato is the world’s first SASE platform, converging SD-WAN and network security into a global, cloud-native service. Cato optimizes and secures application access for all users and locations. Using Cato, customers easily migrate from MPLS to SD-WAN, optimize global connectivity to on-premises and cloud applications, enable secure branch Internet access everywhere, and seamlessly integrate cloud datacenters and mobile users into the network with a zero trust architecture.

**Cato Cloud**
- Global Private Backbone
- Edge SD-WAN
- Security as a Service
- Cloud Datacenter Integration
- Cloud Application Acceleration
- Mobile Access Optimization
- Cato Management Application
- Work From Home

**Managed Services**
- Managed Threat Detection and Response (MDR)
- Intelligent Last-Mile Management
- Hands-Free Management
- Site Deployment
